

PHANTOM GLIDE

Apply Once, Glide Forever.

Welcome to PHANTOM Glide

PHANTOM Glide is a permanent, high-performance base treatment for skis and snowboards that increases hydrophobicity and improves glide performance across a variety of snow conditions.

PHANTOM was launched in 2017 to provide a solution for winter sports athletes who desire predictable, consistent glide over snow while also addressing the environmental impacts of fluorocarbon wax.

PHANTOM has undergone constant evolution to refine our application process and improve our performance. We are now expanding beyond our base treatment to offer multiple new products that complement PHANTOM Glide and complete the necessary tool kit for base care of skis and snowboards.

It's time for PHANTOM Glide to come out of the back-shop and onto the sales floor to show the customer that it's a premium product for improving the performance of their equipment.

NEW FOR 2023

Base Cleaner

A clean base is a fast base. Our spray-on base cleaner removes dirt, skin glue and other base contaminants that inhibit glide. Prepping the base with our Base Cleaner is the first step to applying PHANTOM Glide.

- Single 4oz bottle of Base Cleaner.

NEW FOR 2023

Base Care Kit

Clean and polished bases move faster over snow. Our new Base Care Kit gives customers the tools they need to perfect their bases in three easy steps: Clean, Prep, and Polish. Used in the correct order, each pad will contribute to improving glide and base appearance in between tunes.

- 4 cleaning pads, 2 Priming pads and 2 NEW Polishing pads.

NEW FOR 2023

At-Home Kit

Our all-inclusive kit combines the Base Cleaner, Base Care Kit, and Single Application Kit into one, providing the customer everything they need to apply PHANTOM Glide and take care of their skis or snowboard like a professional.

Single Application Kit

This kit contains a single application of PHANTOM Glide to be used on one snowboard or one pair of skis. It can be sold as an add-on to any hardgoods web sale, individually to be applied at an authorized dealer, or as an additional application for the At-Home Kit.

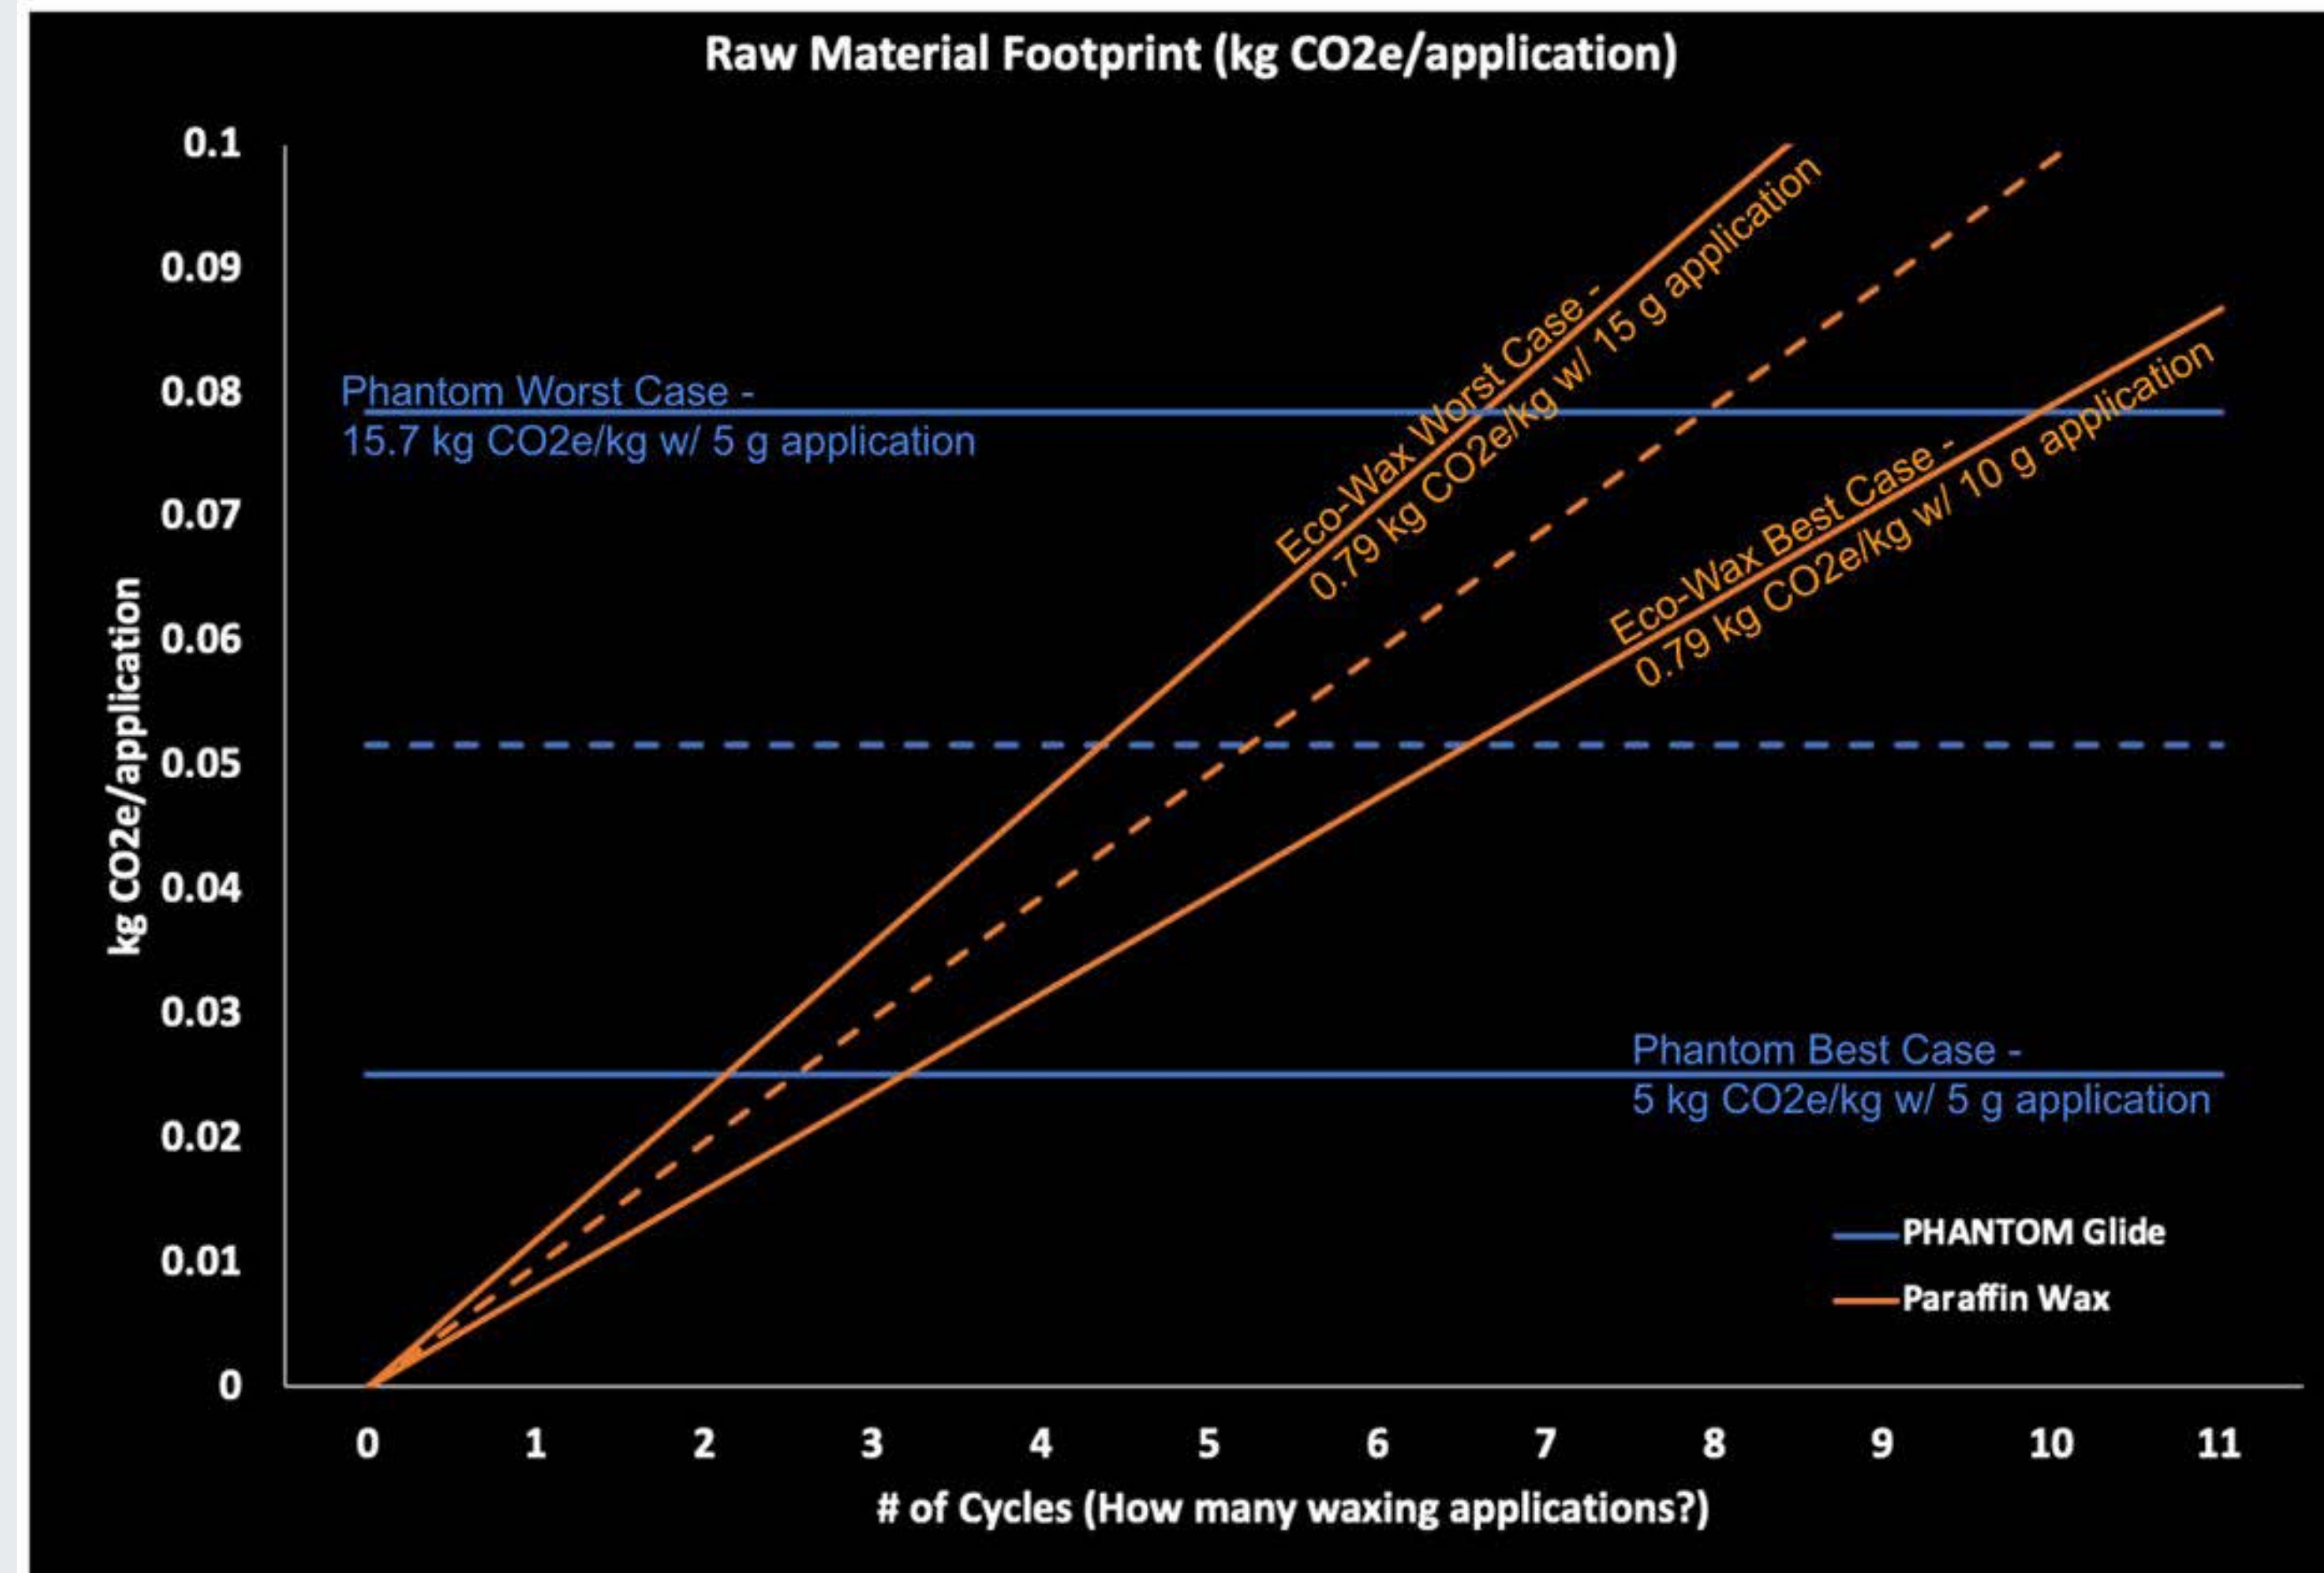

Bulk Spray Kit

The Bulk Spray Kit is intended for tune shop use. When used in conjunction with our UV Cure Station, the Bulk Spray Kit is quick to apply and can be used for 50 pairs of skis or 50 snowboards. Offering PHANTOM Glide Base Treatment is the best way to add a high margin product to your shop service menu.

Carbon Footprint of PHANTOM Glide Base Treatment

PHANTOM Glide is an industry leader in sustainable, environmentally conscious base treatment. Because PHANTOM Glide is a one-time permanent treatment, once it's applied to the ski the carbon footprint of PHANTOM remains the same over time, unlike traditional wax which requires repeated application.

PHANTOM Glide Base Treatment can be sold as an add-on product, an upgrade to an existing product, or used to ensure predictable glide on rental and demo skis. With the addition of the new products for 2023, we are expanding on an already successful, revenue producing product. Don't leave money on the table. Choose PHANTOM Glide as a premium brand for your shop today.

Thanks for being a part of it all.
